High Performance Computing Center
Stuttgart (HLRS)

Unicore Summit, 31th August 2006

- **Type of project:** Integrated Project
- **Project coordinator:** Mr. Santi Ristol
santi.ristol@atosorigin.com
(ATOS ORIGIN)
- **Project start date*:** 1st June 2006
- **Duration:** 42 months
- **Max EC contribution:** 15.7 M euros
- **Consortium:** 75 partners

Project Data Sheet

The mission of BEINGRID is to Exploit European Grid middleware by creating a *toolset repository* of Grid services from across the Grid research domain and to use these services to deliver a set of *successful business experiments* that stimulate the early adoption of Grid technologies across the European Union.

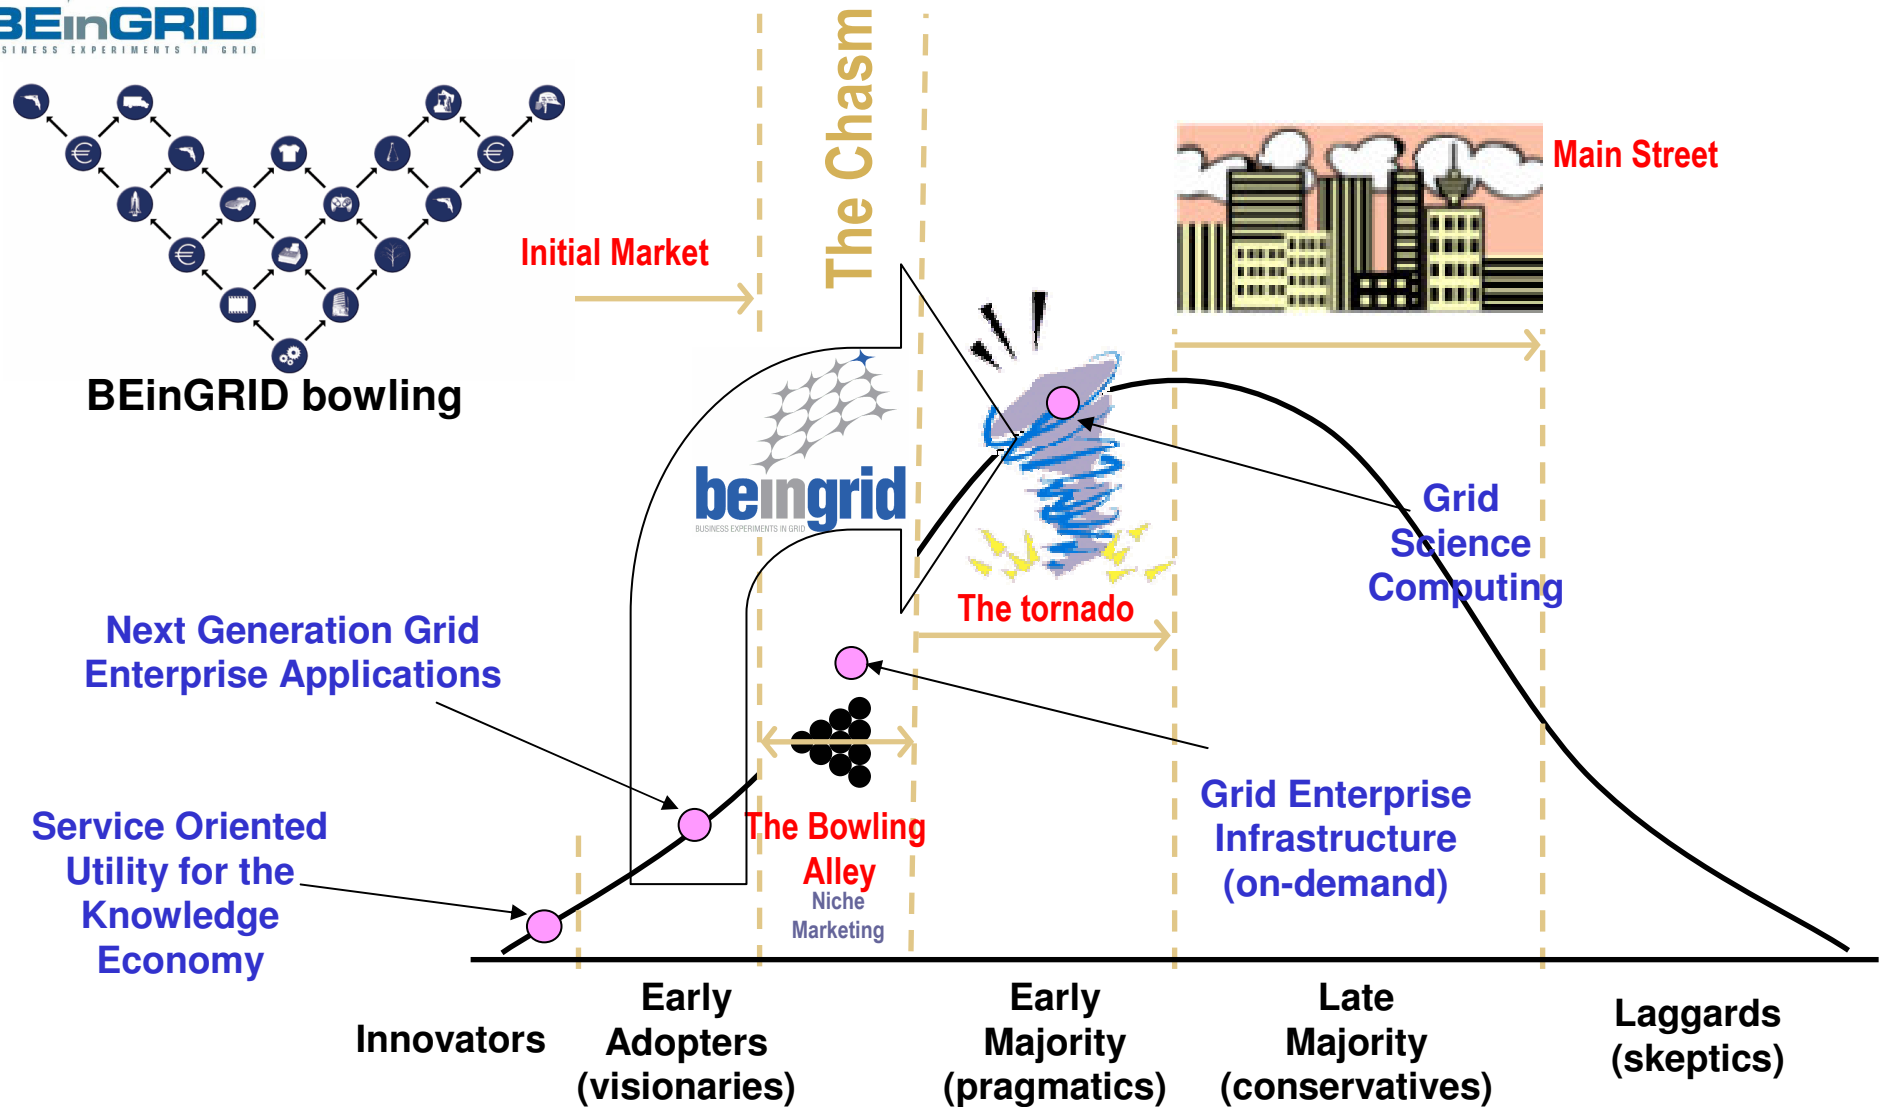

- **Europe is a leading player in Grid research (upper layers)**
 - As a result of FP5 and on-going FP6 IST Grid research, there has been significant number of software middlewares and tools.
 - GRID architectures solutions for enabling the management of distributed resources across multiple enterprises boundaries and creating collaborative environments (Virtual Organisations)

- **Grid technology is coming of age**
- **Future ICT in next decade will be dominated by service orientated architectures**
- **Grid is moving from research and academic use to a wider adoption by enterprise**
- **There is a market place for Grid services**

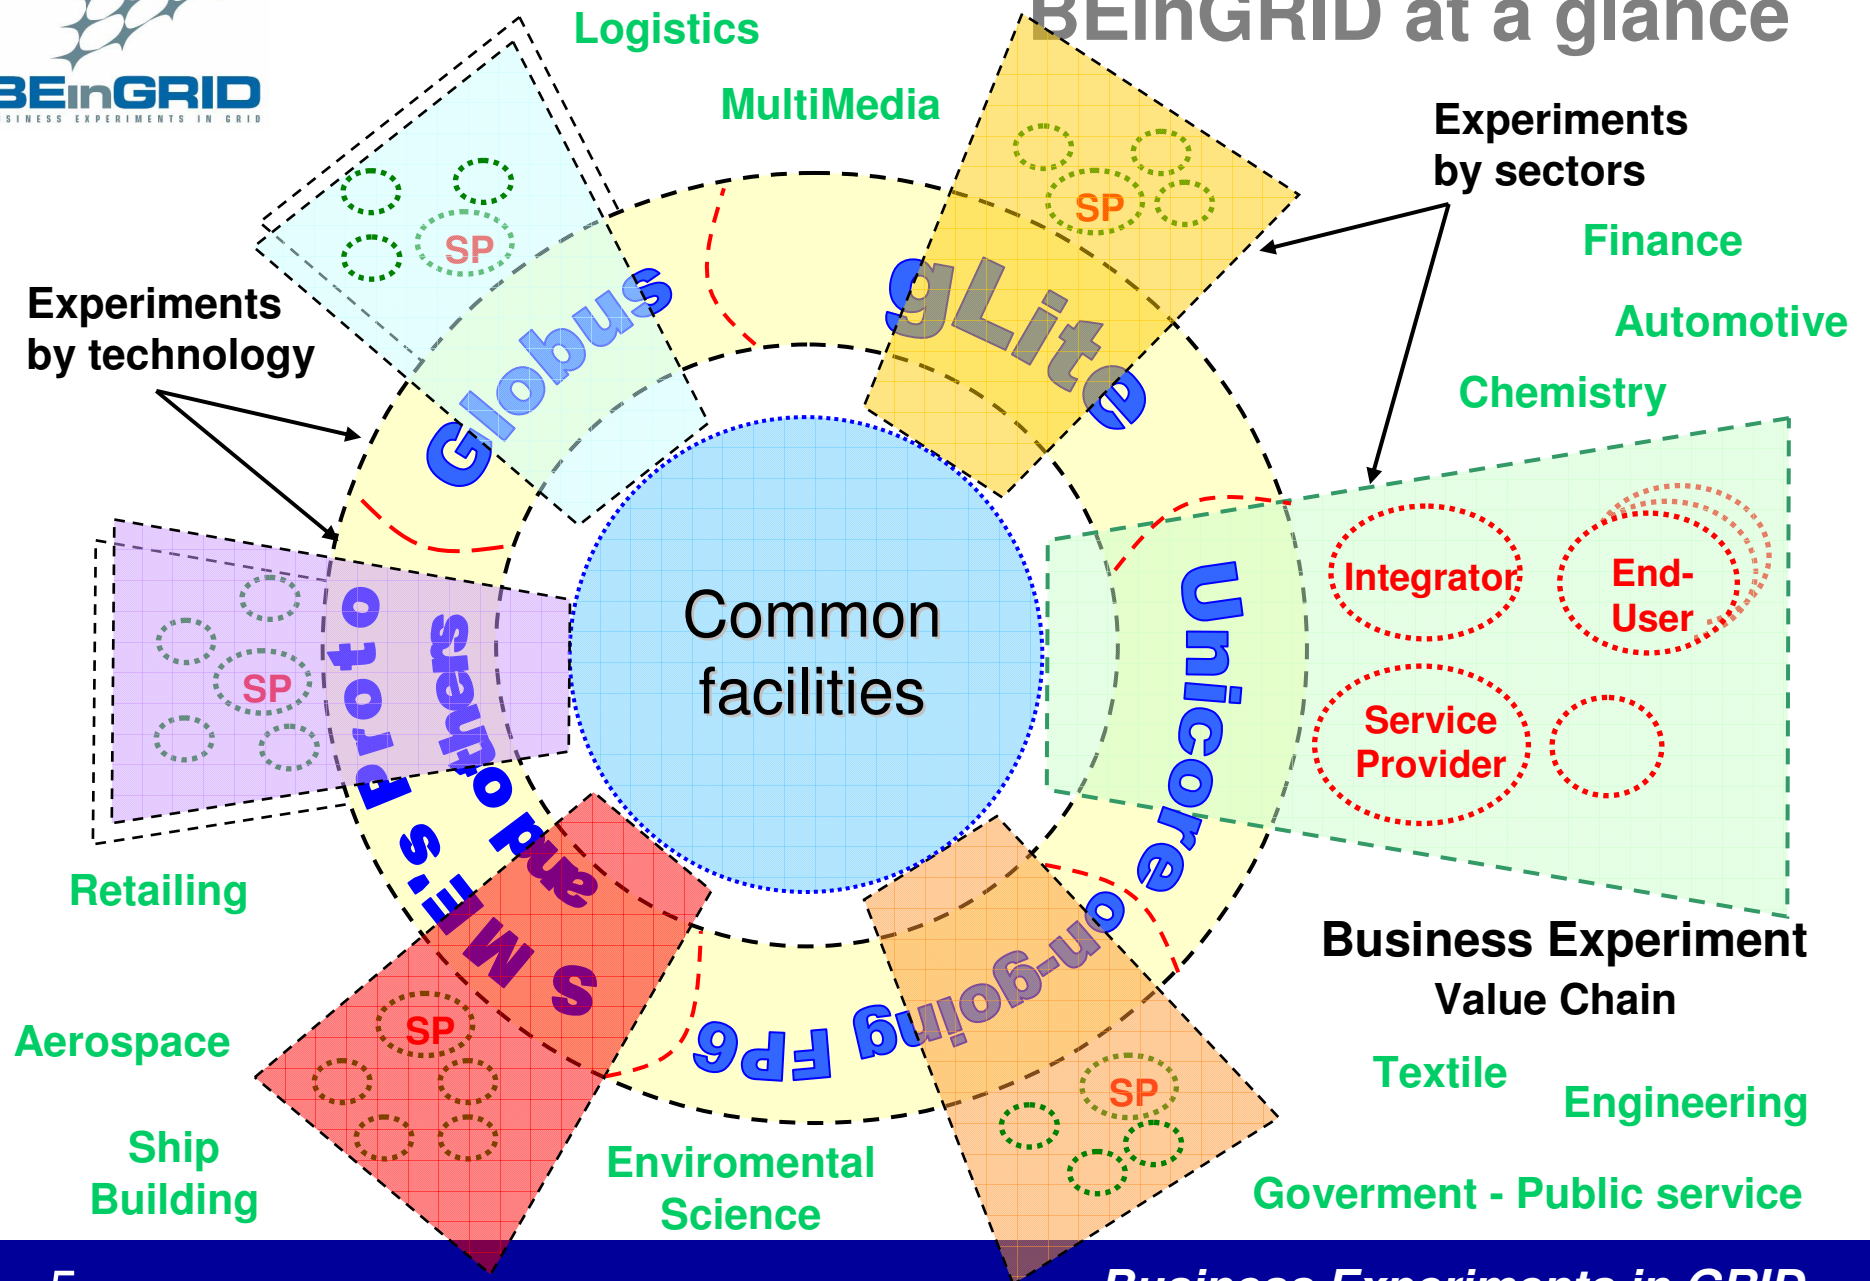

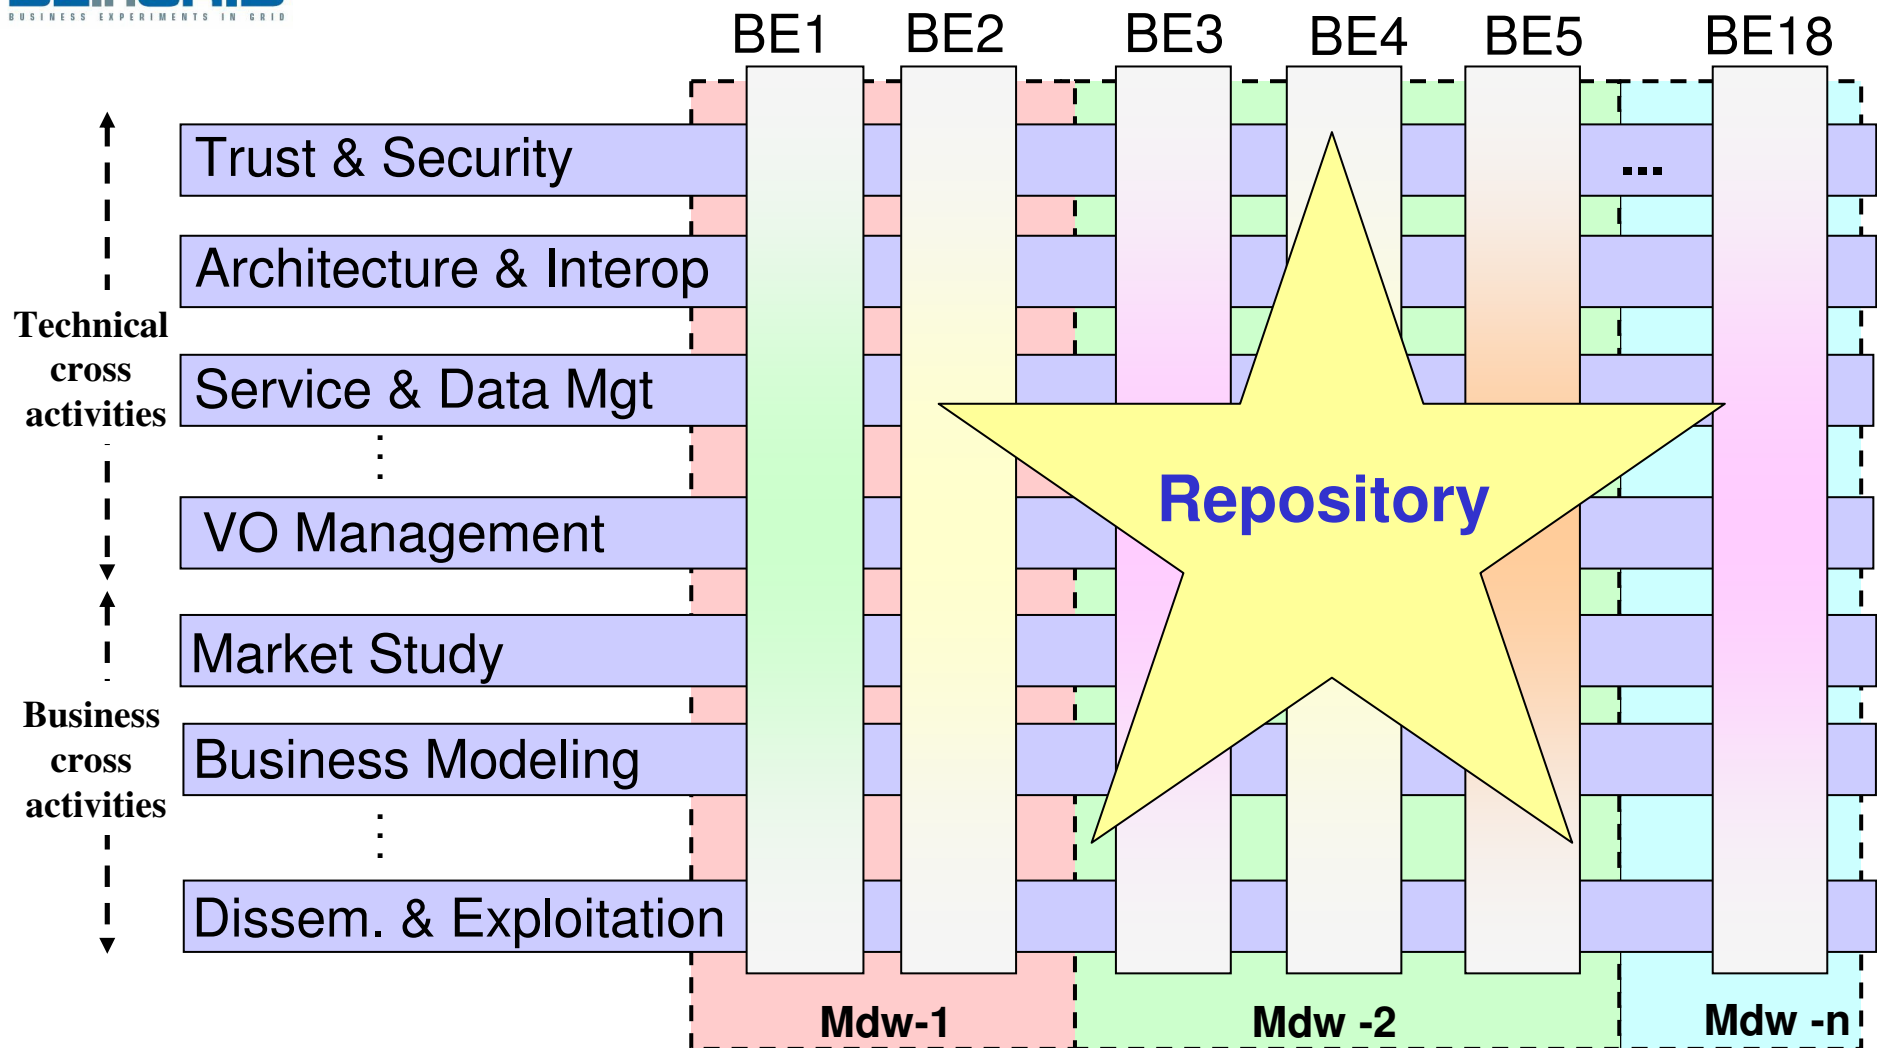

Grid Technology Adoption Life-cycle
