UNIC🌐RE

Custom code execution using the UNICORE middleware

Piotr Piernik, Piotr Bała, Krzysztof Benedyczak

Compile and run in grid environment
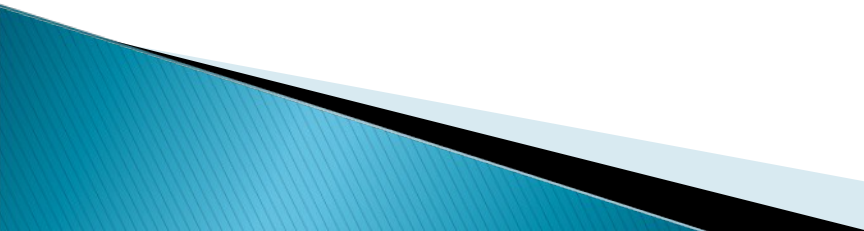

- Powerful tools
  - D2E
  - ETICS 2

- MPI:
  - MPI-Start

- UNICORE:
  - Script GB (compilation & execution)
  - Workflow: generic GB + custom executable
  - Execution environment for MPI (hard in case of compilation).

New solution features

- Simple, dynamically built user interface embedded in the URC.
- Ability to use a source code from local or remote machine.
- „Compile and run" in a single job which may be part of a workflow.
- Convenient execution and compilation of MPI applications. Support for various MPI implementations (by means of MPI-Start).
- Support for applications which use autotools.
